

Protect-It™ Stackable

Economical solution for improving warehouse safety

Protect-It™ Stackable rack protection guards are innovatively designed to provide shock absorbent impact protection for pallet racking. Capable of handling the typical knocks as well as heavier collisions that can take place when using forklift trucks.

They are cost effective, quick to install and easy to replace making them a highly economical rack protection solution for your business.

Features

- Low purchase and installation costs.
- Securely grips the column with no separate fasteners.
- Can be stacked and configured to suit your site.
- Effective in cold stores as low as -40 degrees.
- Easy to remove for rack inspections.

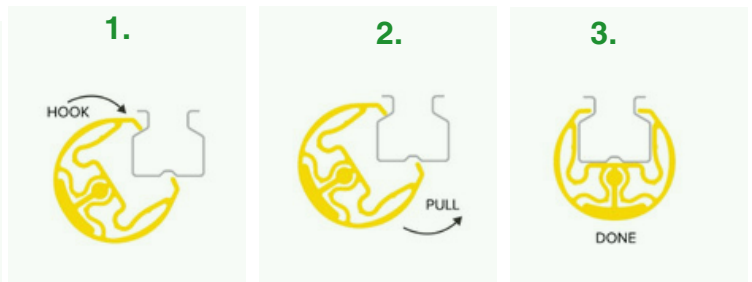

Safety

Independently tested for front and side impact. Passes impact tests from Australian Standard AS4084 and European Code FEM 10.2.02

Easy Installation

Protect-It™ Stackable is easy to install with no drilling or separate fasteners. The spring clip design ensures a secure grip to your rack upright.
